SYSTEMS

AUTOMATIC SYSTEMS is a world leader in the automation of secure entrance control. The company has been designing and manufacturing pedestrian, vehicle and passenger access systems for over 45 years.

Founded in 1969, Automatic Systems has developed a unique know-how in the design of high-end obstacles, one-person detection and throughput management making it a brand renowned for the high quality of its products in terms of performance and reliability.

The company is part of the Bolloré group, assurance of a long-term investment strategy and stability for the company.

In 2016, Automatic Systems' net sales were 71.9m Euros with 348 employees.

Our large worldwide business network includes offices and subsidiaries in Belgium, France, Spain, the United Kingdom, Canada, the United States and China, a vast international network of distributors and local partners, as well as 6 manufacturing plants (3 in Belgium and 1 in France, Canada and China) and 3 R&D sites.

- Every day, more than 90 million people use Automatic Systems' equipment worldwide.
- Automatic Systems' public transportation products are in use in 25 countries.

Automatic Systems strongly believes that a customer is a partner and a supply contract a long-term commitment to service and quality. Our products are designed to suit the purposes and requirements of our clients who can always rely on us.

At Automatic Systems we know that the only way to stay at the forefront of market trends and customer requirements is by innovating and mastering technology. That's why we invest heavily in Research & Development and have highly advanced resources and expertise for all equipment components (mechanical, electronic, software, etc.).

Operating worldwide, we provide a network of sales, customer service and maintenance programs, technical support, spare parts and training facilities. Our partners have also privileged access to the full documentation of Automatic Systems via our extranet platform, Partnerweb.

AUTOMATIC SYSTEMS Pedestrian Products

Entrance control automation in a building or at the perimeter of a site allows high throughput capacity while increasing security and reducing operating costs. Automatic Systems offers a wide range of innovative, elegant and high performance products designed for controlling pedestrian access while combining security, speed, and user protection with very high reliability. Our products are compatible with all access control systems.

Automatic Systems' pedestrian portfolio includes optical turnstiles, SmartLane and SlimLane, Swing Gates, Tripod and Full-Height Turnstiles, Security doors - ClearLock, RevLock and the InterLock series.

AUTOMATIC SYSTEMS Passenger Products

Automatic Systems access control portfolio covers the needs of public transport, immigration, airport, metro and railway applications.

The automation of entrance control reduces operating costs and enhances security, consistent with improving the flow of passengers and increasing their satisfaction.

Combining automation with high security, our equipment includes a complete range of extremely reliable automatic access control gates such as tripod turnstiles, high-security unguarded gates, free-exit doors, bi-directional gates for people with reduced mobility, retractable gates, high-speed and high-security gates, one-way doors and filtering gates.

Additionally, Automatic Systems products are ready for the integration of biometric and electronic passport readers.
